

How to “Jump Start” Honda Fit GP5

Can I “Jump Start” my GP5 ?

Yes you can, same as the other vehicles.

Precautions.

1. Make sure your power system is “Off” before connecting the booster cable.
2. Look for the battery acid levels at first. If there is any abnormality (Low acid level) correct those before jump starting.
3. Make sure to get a 12V battery for jump starting

Order of connections

1. Your battery +
2. Other battery +
3. Other battery -
4. Stud bolt of your vehicle (Please see the photo below)

Order of disconnecting

1. Stud Bolt
2. Other battery -
3. Your battery +
4. Other battery +
